## "KP Diamond" CEM I/42.5N

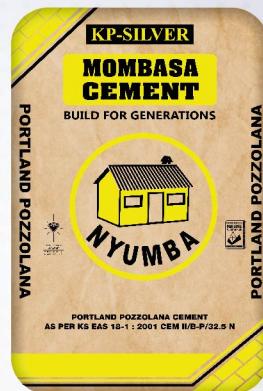

High Strength Cement  
for use in heavy structure,  
roads, high rise buildings,  
bridges, dams and  
other heavy civil work.

## "KP Gold" CEM II/B - P/32.5N

Premium Cement mainly  
used for General  
Construction purposes.

## "KP Silver" CEM II/B - P/32.5N

Standard Cement mainly  
used for General  
Construction purposes.

NYUMBA® TMT Bars are high strength deformed steel bars used in reinforced cement concrete (RCC) work manufactured by highly advanced technology. NYUMBA® TMT bars are manufactured in compliance with a range of international standards and possess superior properties in strength as well the capability for elongation, ductility, welding and bending. All our steel bars are embossed every one meter with the NYUMBA® TMT mark.

NOMINAL DIAMETER (MM)	I2M STANDARD LENGTH STANDARD WEIGHT IN (KG)
8	4.74
10	7.39
12	10.66
16	18.95
20	29.59
25	46.25
32	75.76
